ABSTRACT

The Alabama Student Assistance Program, a state/federal cooperative aid program to provide financial assistance to residents of the State of Alabama for undergraduate postsecondary education at institutions within the State of Alabama, is described in this annual report for the 1977-78 academic year. A total of 15,710 applications for aid were submitted in 1977 and 2,453 grants were awarded, and $272,930 in Federal State Student Incentive Grant Program Funds were matched on a one-to-one basis, for a total grant expenditure of $545,860. Eligibility requirements for applicants and a classification of applicants for 1977-78 is provided. Grant applicant and recipient distribution are described by geographic location, family income, type of institution, and participating institutions. Tables are provided for each category. (BH)

INTRODUCTION

The Alabama Student Assistance Program is a State/Federal cooperative aid program made possible by Title IV, Part 4, of the Higher Education Act of 1965 as amended and the appropriation of matching funds by the Legislature of the State of Alabama. $350,000 was appropriated in 1975 to establish a grant program for matching Federal State Student Incentive Grant Program (SSIG) funds to provide a program of financial assistance to residents of the State of Alabama for undergraduate postsecondary education at an institution within the State of Alabama.

Alabama Student Assistance Program grants in the amount of $150 were made available to students enrolled in Alabama postsecondary educational institutions during the 1975-76 academic year. During the first year, 9,906 students applied, and 3,496 grants were awarded for total need-based grant expenditure of $524,400. In 1976-77, Alabama matched only $234,810 of its available $663,796 in Federal SSIG funds. Of the 10,642 students who applied in 1976-77, a total of 2,641 grants were awarded for an exenditure of $469,620.

In 1977, the Alabama Student Assistance Program qualified for $884,807 in Federal SSIG funds. However, for the second year in a row the Legislature of the State of Alabama appropriated only $280,000 for matching these funds. Eight Alabama postsecondary educational institutions contributed $54,530 of their funds, and $272,930 in SSIG funds were matched on a one-to-one basis. A total 15,710 students from 88 institutions submitted completed applications representing a total financial need of $19,113,355. From these applicants 2,453 grants were awarded for a total grant expenditure of $545,860.

ELIGIBILITY REQUIREMENTS

In order to be eligible for consideration for an Alabama Student Assistance Program Grant, an applicant must meet the following requirements:

(1) Submit a completed application to the Alabama Student Assistance Program and the Basic Educational Opportunity Grant Program;
(2) Be a resident of the State of Alabama;
(3) Be a citizen of the United States or be in the United States for other than a temporary purpose and intend to become a permanent resident;
(4) Be enrolled in good academic standing as an undergraduate student in a postsecondary educational institution within the State of Alabama and have not previously received a baccalaureate degree;
(5) Not be enrolled in a course of study leading to a degree in theology, religion, or other field of preparation for a religious profession;
(6) Not owe a refund on a previous educational grant, nor be in default on a previous educational loan;
(7) Be unable to complete his/her education at the institution of their choice without financial assistance and have established a substantial financial need with the Alabama Student Assistance Program.

GEOGRAPHIC DISTRIBUTION

All 67 counties in the State of Alabama had applicants to the Alabama Student Assistance Program for the 1977-78 academic year. There were 15,710 complete applications received on or before the deadline of August 1, 1977. Jefferson County with 29.35% was represented by the most number of applicants. Mobile County with 9.70% and Montgomery County with 5.30% were the only other counties which contributed more than 4.00% of the total applicants. As shown in Table I, Geographic Distribution Of Applicants, the other 55.65% of applicants were well distributed among the other 64 counties.

The average earned family income reported on the Basic Educational Opportunity Grant Program (BEOG) need analysis reports of the 15,710 applicants was $5,097. Applicants from 43 counties had an average earned family income higher than the average for all applicants, and applicants from 24 counties had a lower average earned family income.

The "need" for each applicant was determined by subtracting the student's expected family contribution and amount of anticipated BEOG award from the applicant's average cost of education. The average costs of education were determined for each institution from budgets submitted by each institution and included: tuition, mandatory fees, room rent, board, transportation, books and supplies, and certain personal expenses not to exceed $500. The total need, after subtracting the scheduled BEOG award, for each applicant was $19,113,355. Table I breaks down this total need by counties.

Table II, Geographic Distribution Of Grant Recipients, shows the distribution of 2,453 awardees by county. Randolph was the only county with no grant recipients. All other counties with grant recipients ranged from a low of two in Cleburne and Fayette Counties to a high of 734 in Jefferson County with a mean of 18. The three counties which represent 44.35% of the total applicants had 44.56% of the total grant recipients. Only 15.61% of the applicants who completed an application on or before the deadline of August 1, 1977 received a grant award for school year 19-7-78 for a total expenditure of $545,860.

The average earned family income reported on the BEOG Student Eligibility Reports of the 2,453 grant recipients was $3,313, or 35.00% less than the average earned family income of all applicants. The average earned family income of grant recipients by county ranged from a high of $10,855 in Cleburne County to a low of $121 in Lawrence County.

The average need of grant recipients of $1,455 is 19.56% higher than the average need of $1,217 for all applicants. Grant recipients from only 13 counties actually demonstrated a higher average need than $1,455. The need generated by grant recipients in each county, as shown in Table II, Totaled $3,569,702. Of this total, $545,860 was distributed in grant payments, and 15.29% of the grant recipients' determined need was met by Alabama Student Assistance Program awards.

DISTRIBUTION OF GRANT RECIPIENTS BY COUNTY

DISTRIBUTION BY EARNED FAMILY INCOME

Table III, Need Of Applicants By Earned Family Income Level, compares the row variable, need of applicants, to the column variable, earned family income level. The level of need of each applicant was determined by subtracting the applicant's expected family contribution toward education and the applicant's anticipated BEOG award from the applicant's cost of education. The earned family income level is the reported amount of earned income on the applicant's BEOG Student Eligibility Report. Each cell of Table III has two numbers. The first number is "count"--the number of applicants in the category. The second number is the percentage that count is of the 15,710 applicants. For example, to find out how many applicants had a need between $1,000 and $1,099 with an earned family income between $6,000 and $8,999 look in the cell in row seven (Need) and column four (Earned Family Income Level). The number of applicants is 250. Further, those 250 applicants are 1.59% of all persons completing applications for Alabama Student Assistance Program awards.

Row 1, Column 1 of Table III (190) includes 152 applicants who reported no earned income on their BEOG applications and were generated no Student Eligibility Index number. Column 1 is also significant in the fact that 6,261 applicants who reported $0 for earned family income on their BEOG applications were assigned a Student Eligibility Index and, thus, generated a need for an Alabama Student Assistance Program award.

Table IV, Earned Family Income Of Initial And Continuous Grant Recipients By Need, compares the row variable, earned family income, of initial (I) and continuous (C) grant recipients to the column variable, level of need. Column 1, level of need $0 - $599, reveals thirteen initial grant recipients with a demonstrated need less than $600. These students received grants as a result of matched institutional contributed funds.

Table V, Distribution Of Grants By Earned Family Income, reveals in Row 1 that 1,177 grants went to students that reported $0 earned income on their BEOG applications. Row 2 shows that these 1,177 grants comprise the largest percentage (47.98%) of any earned family income level. Row 3 is a comparison of number of grant recipients in each earned family income level to the total 15,710 applicants. Row 4 is the percentage of grant recipients of total applicants per earned family income level. Dividing the 1,177 grant recipients with reported $0 earned family income by the 6,413 applicants with $0 earned family income (from Table III) determines that 18.35% of the applicants with reported $0 earned family income received grants. Students reporting earned family incomes with $1 - $2,999 (Column 2) had a slightly higher percentage of applicants receiving grants (20.02%) than did the applicants who reported $0 family income.

The bottom three rows of Table V give some figures on applicants who did not receive grants (non-awardees) by family income level. The total column shows that 13,257 students who completed applications on or before the deadline of August 1, 1977 did not receive a grant. This was 84.39% of the complete applications.

DISTRIBUTION BY TYPE OF INSTITUTION

For the purpose of distributing Alabama Student Assistance Program funds, the 82 institutions that participated in 1977-78 were categorized into seven types. These categories are:

(1) Four-year public colleges and universities.
(2) Four-year private non-profit colleges and universities.
(3) Two-year public junior colleges and Athens College.
(4) Two-year private non-profit colleges.
(5) Public vocational/technical colleges.
(6) Private non-profit vocational/technical colleges.
(7) Proprietary institutions.

In the state community colleges, the academic division of these institutions was considered a two-year public junior college, and the technical division was considered a public vocational/technical college.

Table VI compares the need of all applicants to the type of institution the applicant was attending. The need level with the largest number of applicants (2,875) was $1,000 - $1,199. This need level included 2,395 applicants with a determined need between $1,000 and $1,099 and was composed of 17.02% of the applicants from four-year public colleges and universities, 32.81% of the applicants from two-year public junior colleges, and 15.32% of the applicants from public vocational/technical colleges. Row 14 Column 7 reveals that 77.04% of the applicants attending proprietary institutions had a need of $2,400 or more.

Table VII, Sex Distribution By Type Of Institution, breaks out applicants, grant recipients, and non-awardees by male initial (I) and continuous (C) and female initial (I) and continuous (C). The first section of Table VII, Number Of Applicants, reveals that there were more female applicants than male applicants in all types of institutions. Female applicants totaled 10,495 (66.80%) and male applicants totaled 5,215 (32.20%). The second section, Number Of Grant Recipients, shows that the percentage of female versus male grant recipients was slightly greater than applicants. Female grant recipients totaled 1,727 (70.40%) and male grant recipients totaled 726 (29.60%). Table VII also gives the average earned family income by type of institution. The highest average earned family income of applicants was $5,971 in four-year public colleges and universities. However, the highest earned family income of grant recipients was $4,943 in four-year private colleges and universities.

Table VIII shows the distribution of applicants by educational level and type of institution. For all types of institutions the largest number of applicants to the 1977-78 Alabama Student Assistance Program were in the freshman class. A total of 4,639 freshmen or 29.53% of all applicants reported on their BEOG applications that they would be in the freshman class.

Table IX, Grant Recipients By Educational Level, shows the educational level for initial and continuous awardees by type of institution attending. In contrast to number of applicants, the largest number of grant recipients 660 (26.91%) were classified as sophomores, as compared to 600 (24.46%) for freshmen, 487 (19.85%) for juniors, and 288 (11.74%) for seniors.

Rows 2 and 3 of Table X, Distribution By Type Of Institution, give the count and percentage of applicants who completed an application on or before August 1, 1977 by the type of institution they attended. Rows 4 and 5 give the total calculated need and percentage of total need of all applicants by type of institution. The $9,798,334 calculated need for applicants from four-year public colleges and universities is 51.26% of the total need of $19,113,355 of all applicants.

Table XI, Grant Recipients By Type Of Institution, shows the distribution of students receiving grants in accordance with the type of postsecondary institution the student attended. The distribution by type ranged from a high of 1,169 grant recipients in four-year colleges and universities to a low of 31 grant recipients in private vocational/technical colleges. These figures were 47.66% and 1.26% respectively of all grant recipients. Row 3 provides a breakdown of the number of grant recipients attending each type of institution compared to the 15,710 students who completed applications on or before August 1, 1977. Row 4 represents the percentage of students who received grants compared to the number of applicants attending each type of institution. For example, 9,080 students attending four-year public colleges and universities applied for 1977-78 Alabama Student Assistance Program grants with 1,169 or 12.87% receiving grants. The percentage of total applicants receiving grants was 15.61%. Four-year private colleges and universities, two-year private junior colleges and proprietary institutions exceeded the overall average of 15.61% as the result of additional grants due to institutional contributed funds.

Fund allocation for 1977-78 was based on the need generated by the 1976-77 applicants to the Alabama Student Assistance Program. The total need of all 1976-77 applicants in each postsecondary educational institution in Alabama was determined. Percentage figures of total need was then calculated for each institution. This percentage was then applied to funds available to determine the total funds available for students at each institution. Row 5 represents the funds that were actually distributed to students attending each type of institution as a result of the fund allocation procedure and matched institutional contributed funds. The $545,860 in grants that were distributed met only 2.86% of the need of all applicants. Row 6 shows the percentage of total need for applicants attending each type of institution that was met by 1977-78 Alabama Student Assistance Program grants. With the assistance of matched institutional contributed funds, the greatest percentage of need was met in two-year private junior colleges at 14.86%, and the least amount of need was met in proprietary institutions with 1.56%. Row 7 reveals that only 6.35% of the total enrollment in two-year public junior colleges submitted applications while 41.88% of the enrollment in proprietary institutions applied. The same two types of institutions represented the extreme in percentage of enrollment receiving awards (Row 8) with .82% and 8.48% respectively.

% of Enrollment Applying	11.95%	14.48%	6.35%	8.94%	7.35%	11.83%	41.88%	10.99%
% of Enrollment Receiving Awards	1.54%	3.86%	.82%	3.45%	.85%	5.17%	8.48%	1.72%

DISTRIBUTION BY INSTITUTION

Table XII, Distribution Of Applicants By Institution, lists in alphabetical order the Alabama postsecondary educational institutions that participated in the 1977-78 Alabama Student Assistance Program. 88 separate institutions were represented by student applicants with five community colleges having applicants from both the academic and technical divisions. The range of applicants from these 93 institutions and divisions was from a high of 1,464 applicants from the University of Alabama in Birmingham to a low of only 2 applicants from Chauncey Sparks State Technical College. The mean of this range was 55 applicants.

The average earned family income reported on the students' BEOG Student Eligibility Reports for all applicants was $5,097. Students from 29 institutions had a higher average earned family income than $5,097, and students from 64 institutions and divisions had a lower average earned family income. Applicants from Huntingdon College had the highest average earned family income of any institution. The average need of applicants ranged from a high of $2,804 for Spring Hill College students to a low of $367 at Chauncey Sparks State Technical College. Applicants from 30 institutions and divisions had a higher average need than the overall average of $1,217, and applicants from 63 institutions and divisions had a lower average need. The five institutions whose students generated the largest percentages of total need in 1977-78 were; Southern Junior College of Business (13.38%), University of Alabama in Birmingham (11.95%), Auburn University (6.84%), Alabama State University (6.33%), and Alabama A & M University (5.95%).

Table XIII, Grant Recipients By Institution, also lists in alphabetical order the 93 participating institutions and divisions. The information presented in this table for eight institutions--Birmingham-Southern College, Booker T. Washington Business College, Brewer State Junior College, J. F. Drake State Technical College, Judson College, Selma University, University of Alabama in Birmingham, and University of Montevallo--includes additional awards to students from institutional contributed funds that were matched one to one by Federal SSIG funds. The range of grant recipients attending the various institutions was from a high of 224 (9.13%) at the University of Alabama in Tuscaloosa to a low of one awardee at seven institutions. The mean of this range for the 78 institutions with grant recipients was 14 awardees. Applicants from 40 institutions had a higher percentage of grant recipients than the overall average of 15.61%.

The average earned family income of grant recipients was $3,313. Grant recipients from 32 institutions had a higher average earned family income than the overall average. The average need of grant recipients ranged from a high $3,216 at Spring Hill College to a low of $626 at Muscle Shoals State Technical Institute. Grant recipients from 23 institutions had a higher average need than the average need of $1,455 for all grant recipients.
